To whom it may concern,

IES Virtual Environment software

I am writing to clarify the ownership of the IES Virtual Environment software.

IES Virtual Environment is an integrated building performance analysis software capable of doing building energy simulation, building code compliance, loads calculation, carbon emission, solar shading analysis, natural ventilation analysis, daylighting or artificial lighting analysis, CFD analysis and fire evacuation etc. It helps building designers to analyse different design options in order to optimise for more efficient and sustainable building.

IES are the sole developers and owners of the Virtual Environment software. This letter confirms that the Virtual Environment is a sole source product, sold and distributed in the United States of America by IES. This product can only be purchased directly from IES. At this time of declaration, there are no agents or dealers in the United States of America authorized to represent this renewal contract.

I trust that this is acceptable if you have any further question do not hesitate to contact me.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Dr Craig Wheatley', with a long horizontal line extending to the right.

Dr Craig Wheatley  
Chief Technology Officer
